**HIGH QUALITY  
STANDARDS**

**MANUFACTURING**

**WIDEST  
PRODUCT RANGE**

Zade Vital is a leading provider of health and nutrition products in Europe and works for healthier and happier living based on R&D, innovation and quality. Zade Global is the sole distributor of Zade Vital in USA.

# power in R&D Infrastructure

## DOMINATION OF THE LATEST KNOWLEDGE AND TECHNOLOGY WITH R&D CULTURE

In Zade Vital Technology and R&D Centers, projects and implementation studies are carried out by scientists having postgraduate and doctorate diplomas in their fields.

## ZADE AND ZADE VITAL AVICENNA R&D CENTER

The R&D Center, which serves with central laboratories equipped with high technology devices, is located in the Zade Vital manufacturing facilities. In the Center where new product studies and patent based procedures are carried out for nutritional supplements, drugs and food, especially natural products, prototype and pilot trials can be performed under GMP standards.

The R&D center in cooperation with many international and national institutions provides service to the industry of pharmaceutical, chemical, food, feed, agriculture, agriculture, veterinary, pharmacy, medicine, food supplements, biotechnology, medical aromatic plants and environment.

# power in R&D Infrastructure

## NATURAL PRODUCTS RESEARCH AND APPLICATION CENTER: DUAMER

A multidisciplinary research and development environment collaborating with leading universities and institutions. DUAMER (Zade Vital Natural Products Research and Development Center) is a multi-center R&D and P&D cooperation project of Zade Vital Research and development studies for endemic, medical, aromatic and oil seed plants are carried out in the R&D center and these studies are transformed into products by Zade Vital.

Product groups developed at DUAMER are as follows:

- Traditional herbal medicinal products
- Aromatherapy products
- Cosmetic and dermocosmetic products
- Natural medicine

Zade Vital also delivers these products all over the world in innovative forms such as **Concept Series** that are unique and have not been done before.

# DUAMER

ZADE VITAL NATURAL PRODUCTS  
RESEARCH AND DEVELOPMENT CENTER

# power in High Quality Standards

Zade Vital is the world's first company awarded with **TS 13811 Hygiene and Sanitation Management System Standard** across all industries.

# power in Manufacturing Under GMP Standards

## EUROPE'S LARGEST SOFTGEL CAPSULE MANUFACTURING FACILITIES UNDER GMP STANDARDS

Zade Vital Drug Manufacturing Facilities built with the latest technology are the Europe's largest high technology-based softgel capsule manufacturing facilities under GMP (Good Manufacturing Practices) standards. With an annual manufacturing capacity of 1 billion soft capsules, the plant is also capable of producing all liquid forms, semi-solid pharmaceutical forms and hard capsules.

## WORLD'S WIDEST PRODUCT RANGE IN COLD PRESS OILS

The Cold Press production method, in which no chemicals are used during the production process, has been performed in Zade Vital Facilities under GMP standards for the first time in the world. Cold Press has gained great attention since last few years as it preserves the nutritional value of the oils. In the Cold Press production unit, no chemicals are used during the production process and the product's natural nutrients and the beneficial components providing the therapeutic effect are best preserved. The most important factor of Cold Press oil production process is that heat is not applied. In this fractionation process, the oil extraction is performed independent from the heat.

# power in Widest Product Range

In Nutraceutical and Cosmeceutical categories, different product types and product forms supports to feel better in every period of life from childhood, to slow down aging effects, to protect from diseases, to gain power and energy, to protect health and beauty of skin and to get older healthfully. Zade Vital aims to reduce the treatment costs as well as help to increase the health status.

## Nutraceuticals

### THE NATURAL POWER OF THE SEEDS

Zade Vital produces supplementation mainly from natural sources. The natural power of seeds from Mediterranean, Aegean and Black Sea regions leads to the innovative products mainly produced with Cold Press.

- **Conceptual Supplementation Series**  
4 Different products in one package
- **Supportive Care Mix Series**  
Different products in one capsule as supportive care
- **Vital Oils**
- **Extracts and Combinations**
- **Vitamins and Minerals**
- **Omega 3 Fish Oils**

## Cosmeceuticals

### VITAMINS AND MINERALS FOR SKIN

Zade Vital produces anti-aging, antioxidant and other supporting products for specific needs in the form of twist-off softgel, thus offers easy access at all hours of the day and night.

- **Twist-off softgels**
- **Liquids**
- **Creams**

IN me**

# Conceptual Supplementation Series

In the new era of nutrition, there arises different needs for supplementation as well. "One for all" concept doesn't work anymore. Supplementation should be targeted, personalized and CONCEPTUAL.

With the idea of conceptual supplementation, Zade Vital Concept Series brings a dynamic approach to healthy life style management. Stratified according to the needs of some special group of people, the Concept Series is the supplementation of future, combining the natural power of seeds with innovation where 4IN1 packaging opens the doors of healthy life.

In concept series the innovation is in the package. The award winning perforated blister pack gives the opportunity to use 4 different capsules at the same time or whenever you want. You can either take morning, noon, afternoon and evening or two in the morning two in the evening or even two one day, two the other day. These easy to use, travel friendly products would make the usage of multiple supplements easier. You won't need to carry 4 different packages at the same time.

The concept series, which are the first steps to personalized supplementation, would allow you to choose the right combination of supplementation according to your risks and needs. From Concept Sport to Concept Cardio, you will have the chance to choose from 12 different products

**4 CAPSULES  
IN ONE BLISTER**

# Concept Mental SUPPORTS BRAIN HEALTH\*

# Supportive Care Mix Series

"Mix Series" is a combination of cold pressed seed oils, omega 3 fish oil and vitamins, minerals and herbal extracts. Designed as a two-color capsule, mixed series give the ease of use by choosing the best option for your self.

Mostly developed for support of a specific condition, "Mix Series" is recognizable by its colors. The combinations are developed according to the synergy between the ingredients and also a specific attention was taken by means of any incompatibilities.

"Mix Series" is also specific due to its packaging. On the contrary to many supplements these products are placed in the shelves as a library style where each supplement is placed showing its back part. Thus it attracts the consumer via the shelf placement and colorful approach.

# Vital Oils

Oils are one of the most ancient forms of natural herbal medicines. A wide range of medicinal and aromatic plants have been explored for their essential fatty acids.

Fatty oils are complex fatty acids compounds, synthesized naturally in different plant parts and have great potential in the field of biomedicine. The reactivity of cold press oils depends upon the nature, composition, and orientation of its functional groups.

In general, the chemical composition of cold press oils is relatively complex, and many different bioactive components are observed. These compounds are pharmaceutically appreciated for their numerous culinary properties.

At present, more than 80% of the global population depends on traditional plant-based medications for human health.

Essential fatty acids can help reduce bad cholesterol levels in your blood which can lower your risk of heart disease and stroke. They also provide nutrients to help develop and maintain your body's cells. Cold pressed oils rich in unsaturated fats also contribute Vitamin E to the diet, an antioxidant vitamin most humans need more of.

Cold pressed oils rich in polyunsaturated fatty acids also provide essential fatty acids that your body needs but can't produce itself – such as Omega 6 and Omega 3 fatty acids. Omega 6 and Omega 3 fatty acids are important for many functions in the body. You must get essential fats through food.

THE JOURNEY OF  
A SMALL DROP  
COLD PRESS  
PROCESS 

Fatty acids is needed to build cell membranes, the vital exterior of each cell, and the sheaths surrounding nerves. It is essential for blood clotting, muscle movement, and inflammation. It helps you absorb some vitamins and minerals.

For good health, the majority of the fatty acids that you eat should be monounsaturated or polyunsaturated. AHA Recommend to eat foods containing monounsaturated fatty acids and/or polyunsaturated fatty acids instead of foods that contain saturated fatty acids and/or trans fatty acids.

# Extracts and Combinations

Medicinal plants are priceless sources of bioactive compounds, and despite the contemporary progresses in pharmaceuticals and drug developments, they remain a major source of medicine.

During past few years, as a result of intense concern about all aspects of ecology, there has been a renewed interest in natural drugs. In recent past, many works have been carried out in the field of plant-based medicine.

Herbal remedies that have demonstrable therapeutic activities have provided a potential against to pharmaceuticals and deserve increased attention.

Extracts represent naturally occurring phytochemicals that have been extracted from the inert structural material of the plant that produced them.

Check these to understand the quality of herbal extracts.

- High quality raw material
- The correct properties of the finished product
- High quality manufacture at GMP standards
- Stability

# EMPOWER YOURSELF Everyday

  
ZADE | VITAL®

[www.zadevital.com](http://www.zadevital.com)

power  
IN me

# Vitamins and Minerals

Vitamins and minerals are normally obtained through a healthy diet, and are absolutely crucial to intake for optimal human functioning.

Ingesting optimal levels results in optimal human functioning and having lesser than optimal intake results in non-optimal states.

Each vitamin or mineral has a recommended intake range which should be aimed for through diet first and supplementation afterwards.

People as vegans, young children, older people, pre-pregnant and pregnant women, alcohol consumers, lactating women, smokers, people with absorption problems etc. are highly advised to use vitamin and mineral supplements.

Minerals also help your body function. Some minerals, like iodine and fluoride, are only needed in very small quantities. Others, such as calcium, magnesium, and potassium, are needed in larger amounts.

# Omega 3 Fish Oils

Omega 3 and Omega 6 fatty acids play important roles in human health and disease. Both are considered essential fatty acids, because they are not endogenously synthesized and must be obtained from the diet.

Long-chain Omega 6 fatty acids include linoleic, gamma-linolenic, and arachidonic acids. Omega 3 fatty acids include the long-chain alpha-linolenic acid (ALA), eicosapentaenoic acid (EPA), and docosahexaenoic acid (DHA).

Following consumption, polyunsaturated fatty acids, such as the Omega 3 and Omega 6 fatty acids, are incorporated into cell membranes, where they modulate membrane protein function, cellular signaling, and gene expression.

In addition to their anti-inflammatory activity, Omega 3 fatty acids have well-described effects on various risk factors for cardiovascular disease.

Dietary guidelines recommended by The American Heart Association (AHA) for healthy individuals include consumption of fatty fish at least two times a week, along with plant-derived Omega 3 fatty acids. There are differences on the intake of EPA and DHA in every stage of life. The amount of intake of a child, of an adult, of a pregnant woman or of a breastfeeding mother differs. In order to provide best Omega 3 support to every stage of life, Zade Vital Omega 3 Fish Oil Series have 5 different segments. EPA and DHA ratios should be based on scientific proofs. EPA and DHA ratios in Zade Vital Omega 3 Fish Oil Series are determined in Zade Vital R&D Centers. International clinical studies and guidelines have been scanned with the aim of identifying ideal EPA and DHA ratios for different age groups.

**There are two structural forms of fish oils as "ethyl ester" and "triglyceride". Triglyceride forms are the natural forms, thus their absorption and bioavailability are higher than ethyl ester forms. Zade Vital Premium Omega 3 Fish Oil Series developed especially in triglyceride form.**

Fish oil has to be free from heavy toxic metals such as lead and mercury. Body part of the fish from which the fish oil is extracted is very important. The fish oil obtained from the liver has high risk of heavy metal content; this risk is minimized when the oil is extracted from the body itself. The raw materials' analysis certificates should prove that the fish oil is free from heavy toxic elements such as arsenic, lead and mercury.

# OMEGA 3 FISH OIL

- ✓ Supports heart health\*
- ✓ Supports immune system\*
- ✓ Supports joint health\*
- ✓ Supports eye health\*

# Cosmeceuticals

It consists of products developed by Zade Vital in order to support skin, hair and nail health. The products are made of twist-off softgel and 20, 50, 100, 200 ml liquid forms.

Zade Vital produces anti-aging, antioxidant and other supporting products for specific needs in the form of twist off softgels capsules, offering easy access at all hours of the day and night.

Cream and gel groups include special products such as cream for stretch marks during pregnancy and many others.

## THE IMPORTANCE OF COLD PRESS

The materials that our bodies cannot produce and that have to be taken from outside sources are called essentials. The Cold Press method for the extraction of oil from seeds enables the essential fatty acids Omega 3, Omega 6 and Omega 9 to directly pass to the oil as no heat or chemical substances are applied during the process.

The vitamins and antioxidant compounds preserved in Cold Press oils during the production process help strengthen the skin's connective tissue and help prevent damages that cause wrinkles. When used internally, Cold Press oils provide the skin a radiant and healthy appearance by nourishing its cells.

Produced without heat processes and within highly sensitive parameters, Cold Press oils used externally helps to repair splitting hair and gives hair a shiny, healthy look by providing moisture. It helps to prevent hair loss and dandruff and also nourishes the follicles resulting in stronger and faster growing hair.

## LET'S TWIST-OFF FOR BEAUTY

A twist-off softgel's shell is composed of two pieces, a body and a cap. The cap of a twist-off softgel can be removed, enabling the insertion of a measured dose. These are used for topical and oral applications. For the administration of oils onto the skin, twist-off softgels are easy to use and hygienic. It gives the advantage of dose adjusted usage for every day use.

- ✓ Moisturizer and facial-dermal cleanser

The Cold Press method for the extraction of oil from seeds enables the essential fatty acids Omega 3, Omega 6 and Omega 9 to directly pass to the oil as no heat or chemical substances are applied during the process.

A twist-off capsule's shell is composed of two pieces, a body and a cap. The cap of a twist-off capsule can be removed, enabling the application of a measured dose.

**DIRECTIONS:** Twist-off the cap and apply 1 softgel to the skin as needed preferably at night. Only for external usage.

**WARNINGS:** Avoid direct sun exposure immediately after application to skin. If irritation occurs, stop using the product. Keep product away from sunlight, heat, humidity, and close tightly. Avoid contact with eyes. Due to the nature of the ingredients, natural color variation, precipitates, solidification, or turbidity may occur in this product.

**ALLERGY NOTICE:** Keep away from sensitive areas. Should not be used in people who are allergic to any of the ingredients.

# POMEGRANATE SEED OIL

Designed for Ease of Use

- ✓ Helps skin feel more toned, and combat aging
- ✓ Helps skin retain moisture naturally and soothe irritated skin
- ✓ Skin moisturizer due to its rapid absorption
- ✓ Antiaging (slowing the effects of aging)

The Cold Press method for the extraction of oil from seeds enables the essential fatty acids Omega 3, Omega 6 and Omega 9 to directly pass to the oil as no heat or chemical substances are applied during the process.

A twist-off capsule's shell is composed of two pieces, a body and a cap. The cap of a twist-off capsule can be removed, enabling the application of a measured dose.

# ST. JOHN'S WORT OIL

Designed for Ease of Use

One of the great way to extract the therapeutic properties of plants and herbs is to make a maceration. With the maceration extraction method, fresh botanical materials are soaked in hot vegetable oil, to have their cell membranes ruptured and the carrier oil then absorbs the essence. The oil is then cleared of the botanical component.

Treatment support in skin damages due to burns and external wounds  
External treatment support aids for healing of skin

30 TWIST OFF SOFTGELS

✓NON-GMO ✓3<sup>RD</sup> PARTY TESTED ✓KOSHER ✓HALAL

- ✓ Supports the repair of damaged and burned skin
- ✓ Helps soothe pain associated with sunburns and other minor burns

One of the great ways to extract the therapeutic properties of plants and herbs is to make a maceration.
